Comment Text :

- 1 -->Speaking on behalf of 250 homeowners in my homeowners association, we are  
vehemently opposed to this project. A repository of nuclear waste in our back yards  
2 simply does not appeal to us; moreover, transporting it next to our children with a  
great potential for problems to occur (accidents in NV are common as we all know) is  
just not an option. I trust that if you have children or care about where you live,  
you will not allow this project to procede. If it must, I hope that the government  
would find a transportation route where the fewest number of individuals travel (i.e.,  
not on the LV Beltway, but via some northern route and/or central NV). Thank you in  
advance.

Todd Lefkowitz
